

# *Minerals that are used in your daily lives.*

Natural minerals like talc powder, soapstone powder, dolomite powder, quartz powder are most commonly used in the paper industry, paint, and rubber, etc. Vasundhara Micron is one of the leading manufacture and supplier of talc powder, dolomite powder, and soapstone powder.

## **TALC POWDER**

Talc powder is the powder that is mainly used for the manufacturing paint, rubber, and paper industry as it is a common powder that is used in all industries. It is in a clay material form and mainly used in baby powder and etc. We are the **manufacturer and supplier of talc powder in India.**

## **SOAPSTONE POWDER/ LUMPS**

It is created by altering the magnesium minerals either in their original state or in their second state. As a basic raw material, soapstone powder/talcum is used to make composites and paints as well as the pharmaceutical and PVC industry. We provide the best soapstone powder in India which is very safe and best quality.

## **QUARTZ POWDER**

Quartz, as we know, is a crystalline mineral made up of silicon and oxygen atoms. The world's most popular mineral and the second most abundant mineral are both ores. It is used in Tiles, construction, detergents, soap, etc. As we provide the best **quartz powder in India.**

## **DOLOMITE POWDER**

A dolomite powder contains double carbonates of calcium and magnesium, whose chemical formula is  $\text{CaCO}_3$ . The process formed in nature is called dolomitization, and it involves the action of magnesium-bearing solutions on calcite. Hence it is used in paints and putty. Hence we provide the best **dolomite powder in India.**

## **CALCITE POWDER**

This Powder is generally found in water and fire extinguishers, calcium carbonate powder is a combination of natural calcium and carbonate. With an exceptionally high degree of whiteness, purity, and free-flowing characteristics, it is usually regarded as a natural form of calcium carbonate. Plastics use it as a filler because it disperses easily, absorbs little oil, has a smooth surface, and is highly impact resistant. Since we are the best **calcite powder manufacturers and suppliers in India.**
